The journey to your roots

With the Italea project

you can return to your ancestral lands with a **touristic offer** exclusively tailored to you.

If you wish to undertake your roots journey in Italy, you will find **bespoke itineraries** that will take you to the places of family and collective memory.

With the support of **specialized genealogists**, you'll be guided in reconstructing your family tree, identifying your ancestors' home, locating the family parish and cemetery, and, hopefully, tracking down relatives living in Italy.

**The places that tell
the story of many
generations of emigrants
are now ready to
welcome you to
reconnect the threads
of time.**

The offer, structured through a **national network**, enriches the uniqueness of the different territories. Brought to life by experts in roots tourism, trained specifically for this purpose, and involves multiple operators offering you the most exclusive services.

The **roots workshops** provide an opportunity to feel an integral part of the country's culture and traditions, enhancing your language skills, discovering folk dances and music, learning the secrets of local crafts, and much more.

The **Italea Card** will allow you to access discounts, benefits, and special attention that will make your journey unique and unforgettable.

The **formative and study experiences** will be an extraordinary opportunity for you to deepen your connection with Italy, by immersing yourself in the daily life of the communities.

2024 The Year of Italian Roots in the World.

The Italea events program is a grand collective celebration that honors "the many worlds" of Italians and "the many ways" of feeling Italian, with an incredible calendar of initiatives across Italy and abroad.

Welcome back to Italy!

Italea:

this name combines the words "Italia" (Italy) and "talea" (cutting), a practice that allows a plant to regenerate itself in a different place from a single cut branch.

It is the perfect metaphor for emigration, paying tribute to our ancestors who moved away from their homeland to grow and flourish in other parts of the world.
